

Yusuf Nurudeen

Software Engineer & AI Workflow Architect

nurudeeny17@gmail.com • (234) 8117934639 • Abuja, Nigeria • <https://github.com/ndeen17>

SUMMARY

Software Engineer & AI Workflow Architect with 8+ years of experience building scalable full-stack applications, automating business processes, and integrating AI solutions into real-world systems.

EXPERIENCE

Founder — Needsolutions (Present)

Abuja, Nigeria

- Built and scaled a digital solutions agency, achieving a 40% increase in client satisfaction through AI-powered workflows and automation tools for startups and small businesses.
- Designed client solutions leveraging AI integrations to reduce manual work by 70%, resulting in an average cost saving of \$15,000 per client annually.
- Developed custom software for businesses, achieving a 50% faster deployment time and a 30% reduction in operational costs.

Founder/Developer — Artemis (Present)

<https://www.artemishiring.co.uk/>

- Developed a platform that analyzes CVs against hiring signals such as structure, clarity, and role alignment, providing actionable insights for improvement.
- Simulated real conversations with follow-up questions to enhance users' thinking, communication, and structure skills.
- Implemented a mentor matching feature to connect users with industry professionals for personalized guidance.

Founder — Oruko.mi AI-Powered Nigerian Name Translator (Present)

<https://www.oruko-mi.com/>

- Built and launched Oruko.mi, an AI-driven web application that translates Nigerian native names into English, revealing their heritage, cultural significance, and name variations using the OpenAI API.
- Engineered a feature that allows users to download name interpretations as personalized graphic cards, merging culture and creativity.
- Leveraged OpenAI's capabilities to deliver accurate, context-aware translations without using a traditional database.
- Designed a clean React interface for intuitive user interaction.

Software Engineer — REEKA (08/2024 – 01/2025)

<https://www.reeka.app/>

- Redesigned authentication flow, cutting onboarding drop-offs by 35% and accelerating login speed.
- Resolved 100+ critical bugs and UI inconsistencies, stabilizing the platform and improving user retention.
- Streamlined booking system with real-time feedback (date blackouts, availability checks), reducing double-booking issues.
- Collaborated with cross-functional teams to ship high-priority features ahead of schedule.

Present

Web Developer — Lilassistant (03/2021 – 11/2022)

<https://lilassistance.com/>

- Executed the launch of 12+ websites, enhancing e-commerce and business client visibility and driving user engagement by 20%.
- Customized Wordpress plugins, improving usability and meeting client-specific needs.

Freelance Web Developer — Remote (2020 – Present)

- Created visually appealing designs using Figma and Photoshop, ensuring client satisfaction with the final product.
- Designed and launched full-stack web applications using React, Node.js, and MongoDB.

- Delivered custom features and plugins tailored to client workflows.

Web Developer (Intern) — APO Cyber Cafe (2017 – 2020)

Abuja, Nigeria

- Built and improved 36+ websites using HTML, CSS, JS, PHP, and MySQL.
- Provided hands-on support and maintenance for client sites.

EDUCATION

Certificate in Software Engineering — Holberton University (01/2023 – 08/2024)

Bachelor's degree — University of Benin (2023)
